Relevant medications, comorbidities or other notes

REFERRING PRACTITIONER

GP name	Provider number
Practice name	Practice phone
Signature	Date

We will contact your patient to arrange an appointment, usually within a few days. A written report is returned to you following the assessment. Where findings fall outside our scope, or where medical review is indicated, we will advise you and recommend onward referral. Every hearing aid we fit is verified using Real Ear Measurement. AIM Hearing is an accredited provider under the Australian Government Hearing Services Program and for Department of Veterans' Affairs clients. Conditions apply under the Australian Government Hearing Services Program. A GP referral is not required for a hearing assessment or for ear wax removal, but the clinical information above helps us provide better care and keep you informed.
